CASH MANAGEMENT SOLUTIONS

Pay Solutions

With our automated cash management products we eliminate the need for drop safes, which ultimately pose a high risk of theft for your business and creates huge administrative load and inefficiencies in managing daily cash takings on your sites.

SmartPro5000 TTW

The Smartpro through the wall is modelled off our existing Smartpro5000 product , although manufactured to cater for a specific market, being the forecourt fuel retail sector.

The device is designed to allow for cash drops to be made within the safety of your premises , with cash collections only able to take place from the exterior, eliminating the potential in store risk that cash in transit companies and crewman might impose.

Product Specifications

Our automated cash management and kiosk products provides the retail industry with cost effective and efficient solutions to their security, cash flow and management reporting requirements.
